

Name : Panchal Heer

Subject : C Programming

Session : 2 – Writing Your First C Program

Topic: GCC Installation and Verification

Task 1 : Install GCC on your computer and verify the installation by running `gcc --version` in your terminal or command prompt.

Answer :

GCC Installation Status: Successfully Installed

Verification Command:

`gcc --version`

Screenshot :

```
Command Prompt
Microsoft Windows [Version 10.0.19045.6466]

Topic: Identifying the Basic Structure of a C Program

Task 3 : Identify and label the header, main function, and return statement in your hello.c program using comments.

Answer :

Program Code:

The screenshot shows a code editor with a dark theme. The Explorer panel on the left shows a project named 'MODULE_3' containing a file 'a.exe' and a file 'C hello.c'. The main editor window displays the code for 'hello.c' with the following content:

```
1  C hello.c > main()
2  // Header file
3  #include <stdio.h>
4
5  // main function
6  void main()
7  {
8      printf("Hello, Instagram World!");
9
10     // Return statement
11     return 0;
12
13 }
```

The right sidebar contains a 'CHAT' panel with a 'Build with Agent' section. Below this, there is a search bar and a list of files, including 'C hello.c'. The status bar at the bottom indicates 'Ln 11, Col 14', 'Spaces: 4', 'UTF-8', 'CRLF', and 'Win32'.

Topic: Compiling and Running a C Program Using GCC

Task 4: Compile your hello.c file using the GCC command line (gcc hello.c -o hello) and run the output file to display the message in your terminal.

Answer:

Compile Command:

- gcc hello.c -o hello

Run Command:

- hello.exe

Program Output:

- Hello, Instagram World!

Screenshot:

The screenshot displays the Visual Studio Code interface. The Explorer pane on the left shows a project named 'MODULE_3' containing 'hello.c' and 'hello.exe'. The main editor window shows the source code of 'hello.c':

```
1 // main()
2 // Header file
3 #include <stdio.h>
4
5 // main function
6 void main()
7 {
8     printf("Hello, Instagram World!");
9 }
```

The TERMINAL pane at the bottom shows the following commands and output:

```
PS C:\Users\admin\Desktop\HEER\TOPS\HTML_lists\Module_3> gcc hello.c -o hello
PS C:\Users\admin\Desktop\HEER\TOPS\HTML_lists\Module_3> ./hello.exe
Hello, Instagram World!
PS C:\Users\admin\Desktop\HEER\TOPS\HTML_lists\Module_3>
```

On the right side of the interface, there is a 'Build with Agent' panel with a message: 'AI responses may be inaccurate. Generate Agent Instructions to onboard AI onto your codebase.'
