

Student Name: Panchal Heer

Subject: C Programming

Session : 3 – Data Types and Variables

Topic: Variable Naming Rules

Task 4 : Identify and correct the invalid variable names from this list: 1stPlayer, player_age, \$score, total-marks, userName.

Answer :

Original Variable Name	Status	Correct Variable Name
1stPlayer	Invalid	firstPlayer
player_age	Valid	player_age
\$score	Invalid	score
total-marks	Invalid	totalMarks
userName	Valid	userName

Reason :

- Variable names cannot start with a number.
- Special characters such as \$ and - are not allowed.
- Underscore (_) is allowed.
- Variable names can start with letters.
